

OPTIMIZE BUSINESS PROCESSES WITH MANAGED IT SERVICES

TECHNOLOGY TRENDS THAT SPEAK VOLUMES

For IT leaders, the pressure is on. It's no longer enough to maintain basic operations and streamline communications. Today, the C-Suite expects way more from their IT leaders.

70% of CEOs want IT leaders to focus on driving growth, which is difficult for those already straining to keep networks secure and up and running.

WHY ARE COMPANIES USING MANAGED IT SERVICES?

Managed IT Services allow you to offload specific IT operations to a Managed Services Provider (MSP). The MSP provides 24-hour monitoring, managing and support for the business network, powering profitability by taking the IT burden off internal teams. It's like hiring a seasoned CIO—without the staggering cost.

MOTIVATIONS FOR OUTSOURCING

59% Cut Costs

57% Focus on Core Business

47% Solve Capability Issues

4 BIGGEST IT CHALLENGES HINDERING BUSINESS GROWTH

1. EMPLOYEE RETENTION

More than 25% of employees are at a high risk for turnover.

SOURCE: Willis Towers Watson

Plus, it's expensive to attract and retain talent—it costs around \$4,000 to fill just one open position.

SOURCE: Glassdoor

2. TECHNICAL CERTIFICATION GAP

89% of employers agree that IT-certified employees perform better than uncertified individuals in similar roles, yet many IT employees don't have the time to stay knowledgeable or test on emerging technology.

SOURCE: CompTIA

3. LACK OF RESOURCES

IT departments consist of hardware, software and services, creating multiple vendor relationships which demands more time, attention and budget. 70% of IT leaders say they spend up to half of their total budget on multiple external providers.

SOURCE: CIO Magazine

4. UNEXPECTED EXPENSES

Software purchase price accounts for just 30% of the total investment. The rest comes from management, implementation and labor costs, which can be difficult to accurately predict.
